

Shading Techniques

Shading is the key to producing a great page of designs. Through shading you can produce realistic designs that look 3D. Using the shapes below practice shading to make the shape look 3D.

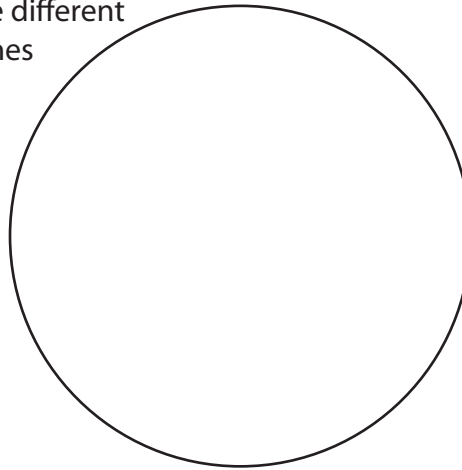

Start by finding 6 different tones with a HB pencil.

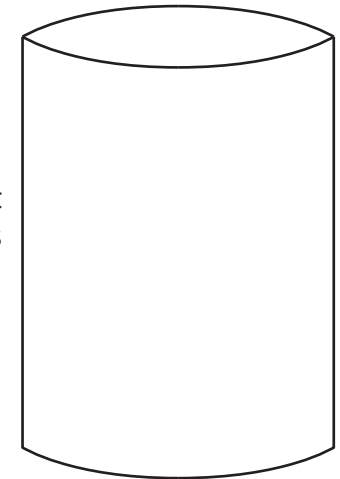

Use a **HB** pencil to get the different tones

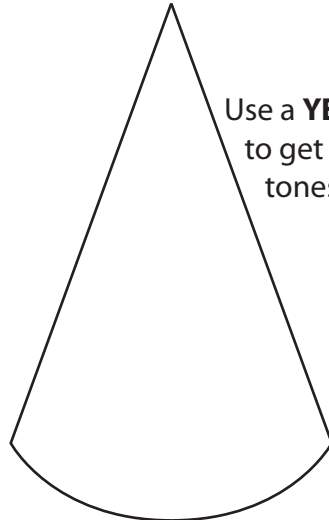

Use a **RED** pencil to get the different tones

Use a **BLUE** pencil to get the different tones

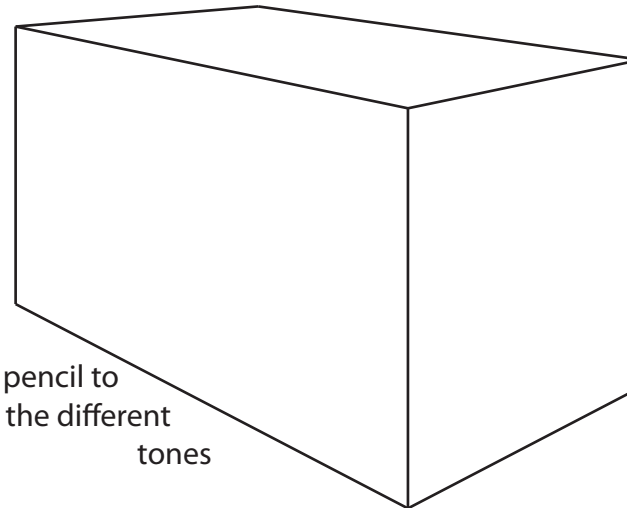

Use a **YELLOW** pencil to get the different tones

 = light direction

Use a **GREEN** pencil to get the different tones
